PROFESSIONAL SUMMARY

Frontend Developer with 6 months of professional experience building production-grade, client-side interfaces using React.js and JavaScript, with working knowledge of Next.js and TypeScript. Focused on frontend architecture, reusable component systems, responsive UI, REST API integration, and real-time dashboards across payroll, order, asset, worker-management, and AI chatbot platforms. Comfortable extending work end-to-end — supporting full-stack tasks are handled with the help of AI-assisted tooling — while primary focus stays on design and frontend engineering.

WORK EXPERIENCE

Frontend Developer (Contract) · Vijji AI

March 2026 – July 2026 | Kathmandu, Nepal

- Built React.js dashboard and chatbot interfaces for an automotive parts ordering platform.
- Developed responsive UI, reusable components, and frontend flows for product discovery, availability, and order management.
- Integrated REST APIs to connect chatbot, dashboard, product catalogue, and ordering workflows.
- Improved the existing MVP's UI, navigation, responsiveness, and overall user experience.

Frontend Developer (Freelance) · KASA & Payroll Management System

- KASA — built the React 18 + TypeScript admin frontend (Vite) for a tailoring-shop management platform, wired to a TypeScript/Express + MySQL API. Live in production at kasaproduct.com.np.
- Payroll Management System — built the React + TypeScript frontend (Tailwind CSS, TanStack Query, React Hook Form) for a Nepal-specific payroll system with BS-calendar payroll runs and statutory tax rules. Live in production at printmrp.com.
- Owned both builds end-to-end; supporting full-stack and API work was completed with the help of AI-assisted development, while primary focus stayed on design and frontend.

KEY PROJECTS

KASA — Tailoring-Shop Management Platform — React 18 · TypeScript · Vite · Node.js/Express · MySQL

Built the admin dashboard frontend — client records, orders, and Nepali-calendar-aware scheduling — end-to-end, integrated with a TypeScript/Express API. Live in production: kasaproduct.com.np

Payroll Management System — React 18 · TypeScript · Tailwind CSS · TanStack Query · Recharts

Built the frontend for a Nepal-specific payroll system — BS-calendar payroll runs, statutory tax/SSF calculations, admin-configurable rate tables, and reporting dashboards. Live in production: printmrp.com

GarageGo — College Final Year Project — React 19 · Vite · React Native · TanStack Query · Tailwind CSS

Verified-garage marketplace with emergency breakdown assistance and live location tracking. Designed and built the admin dashboard, mobile app UI, and the real-time tracking/request-response flow, owning the design system end-to-end (Node.js/Express + MongoDB backend).

Nivaronix Platform — Next.js 16 · React 19 · TypeScript · Tailwind CSS

Built the public marketing site and brand frontend — homepage, interactive security scanner, pricing pages, and an embedded AI widget — on a shared design-system package. Live in production: nivaronix.com

Chikusa Cafe — Website — React 19 · TypeScript · Vite · Node.js/Express · MySQL

Built the customer-facing web app for a live cafe client, deployed on Vercel and backed by an Express/MySQL API.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript (basic), JavaScript, HTML5, CSS3, Axios, Socket.io Client, Responsive & Component-Driven UI
Full-Stack (AI-assisted)	Node.js 18+ (basic), REST API Design, Microsoft SQL Server, PostgreSQL (basic)
Tools & Workflow	Git, GitHub, VPS Deployment, CI/CD Pipelines
Languages	JavaScript, TypeScript (basic), Python (basic)
Soft Skills	Agile/Scrum, End-to-End Feature Ownership, Technical Communication, Team Collaboration

EDUCATION

Bachelor of Engineering — Software Engineering · NCIT

2021 – 2026 | Kathmandu, Nepal

(Nepal College of Information Technology, affiliated to Pokhara University)

- Relevant coursework: Web Technology, OODM, OOP, ADA.

References and additional project documentation available on request.
